Coding Experience

PropSked (www.propsked.ca)
- An online automated service that allows tenants to easily schedule showings without contacting landlords. Landlords can also receive applications after showings (PropSked is being used by several property management companies).
- Worked with a UX/UI designer to finalize the overall design.
- **HTML, CSS, Bootstrap 5, JS, Node, Express, MongoDB, MySQL**.

Other Projects
- YelpCamp.ca (no SSL) – older practise project to learn building RESTful API websites, where users post photos & reviews. **HTML, CSS, Bootstrap 4, JS, Node, Express, MongoDB**.
- Created and implemented web scraper (for personal use) to get notice of availability / price drops of specified products. **Python** (with Selenium), **MySQL**.

Work Experience

IBI Group / Arcadis (Full Stack Developer)

2022 – 2025

- Created webpages for clients, to be used as a part of the online 360 environment products, as well as team portfolio.
- Built various front-end and back-end scripts to aid with various team's needs, such as overcoming API limitations.

FusePM (Leasing and Marketing Division Leader)

2017 – 2022

- Online marketing, renting of properties, leases, and all technical / coding matters, managing ~200 units.
- Used **VBA** in Microsoft Outlook to auto-reply with dynamic messages to prospect inquiries based on specific criteria.
- Used **Python** to create an automated ad re-listing program of rental properties.
- Saved countless hours of company time spent on replying to over 50,000 applicants individually and re-listing ads daily.

Century 21 (Real Estate Agent)

2019 – 2022

- Created a semi-automated system, allowing interested parties without agents to schedule showings using **Active Campaign** and used **Excel VBA** to create an advanced property investment calculator to aid clients after showings.
- Designed and built a client prospecting website with **WordPress** for myself and my partner.
